

COMPANY OVERVIEW

REPEATABLE INFRASTRUCTURE FOR RESPONSIVE SPACE.

PROVE ONCE. DEPLOY EVERYWHERE.

COMPANY

SATELYX is a UK company building repeatable infrastructure for responsive space. Through shared IOD missions, it validates space technology and turns what works into reusable capability. With operations and commercial activity across Asia-Pacific, the team brings experience from national satellite programmes and works with regional partners to build a growing catalog of flight-proven systems.

AT A GLANCE

WHAT WE DO

Validate space technology in orbit through shared IOD missions, then turn successful validation into reusable capability.

OPERATING MODEL

An Agile Prime for responsive space. SATELYX takes responsibility for the shared mission, integration, operations and delivery.

CURRENT PRODUCT

IOD as a Service for accepted hardware and software.

LOCATION

A UK company operating across APAC.

CURRENT MISSION

VLEO Pathfinder targets Q4 2027 as the first SATELYX-led catalog-validation mission.

APPROVED BOILERPLATE

SATELYX is building repeatable infrastructure for responsive space. As an Agile Prime, we run shared IOD missions that validate space technology and turn what works into reusable capability. We manage the bus, integration, operations, data delivery and launch coordination, while every successful validation adds another proven module to the catalog.

LEADERSHIP

APPROVED PUBLIC TEAM

Matthew Mappin

CO-FOUNDER AND CO-CEO

Leads SATELYX's vision, strategy, positioning and commercial development.

Kenneth Tong

CO-FOUNDER AND CO-CEO

Leads technical architecture, mission strategy and executive operations.

Clement Chen
